

GUDA BELT TRACTION SOLUTION

- Hi-efficiency gearless PM motor traction machines, optimized motor design, high efficiency of power conversion, suitable for light lift car.
- Machine-Room-Less, 20% savings in well area. Required top head room and bottom pit depth will be greatly reduced.
- Small-diameter sheave, compact structure and reasonable layout.
- Smooth operation and low noise with composite belts.
- Environment-friendly and low maintenance.
- Patent self-owned, CE certified, conform to EN 81-20/50 directive.
- We provide perfect elevator solutions for sloping roof building and other distinctive buildings.

Capacity: 400kgs – 2000kgs
 Speed: 0.4 – 2.0 m/s
 Input voltage: 1/220V or 3/380V
 Suspension: 2:1
 Max.static load: 5000kgs

Hi-strength TPU clad cable
 Single bending lifetime ≥ 10,000,000 times
 Minimum breaking force 43000N
 Traction Media Size: 31mm Width x 4mm Height
